# ECO SMACCHIATORE

Stain remover in powder form specific for CLINETOR<sup>®</sup>

Technical Data Sheet May 2017

---

## PRESENTATION

**CLINETOR<sup>®</sup> ECO SMACCHIATORE** is a stain remover in powder form specific to **CLINETOR<sup>®</sup>**, with no optical whitener or enzymes.

## FEATURES

**CLINETOR<sup>®</sup> ECO SMACCHIATORE** is composed of pure and stabilised sodium percarbonate. It works as an oxygen promoter while complementing the activity of **CLINETOR<sup>®</sup>** on whatever kind of stain. It respects the clothes, the colours, and the environment.

At the end of the cleaning cycle, it does not leave solid waste or fat as the majority of traditional stain removers and detergents. It does not contain solvents or enzymes, and it is free from scents. Moreover, **CLINETOR<sup>®</sup> ECO SMACCHIATORE** is completely biodegradable and it does not cause any bad smell.

The ionizing action of **CLINETOR<sup>®</sup>** (the ball) enhances the effectiveness of our stain remover as well, making it active already at very low dosages. Two spoons of stain remover are enough to remove even the toughest stains and to give a beautiful natural white. Due to its low dosage, wastewater is only slightly alkaline. Thanks to its peculiar stabilizing treatment, **CLINETOR<sup>®</sup> ECO SMACCHIATORE** is effective at the normal washing temperatures indicated for washing clothes and it avoids discolorations and damages.

## USE

### Use and dosages for machine wash

Put **CLINETOR<sup>®</sup> ECO SMACCHIATORE** in the drawer of the washing machine for detergents at the beginning of the cleaning cycle. For coloured clothes, the normal dosage is a spoonful of **CLINETOR<sup>®</sup> ECO SMACCHIATORE**, for white clothes two spoons.

### Use and dosage for hand washing

Fill a basin with water at the appropriate temperature up to cover the clothes, then add **CLINETOR<sup>®</sup>** (the ball) among the clothes. Aside, put a spoonful of **CLINETOR<sup>®</sup> ECO SMACCHIATORE** in 1 litre of cold water and pour it in the basin stirring slowly. If clothes are white or very dirty, use two spoons of **CLINETOR<sup>®</sup> ECO SMACCHIATORE** in 1 litre of cold water.

**STORAGE AND VALIDITY**

If it is kept in its original packages, **CLINETOR® ECO SMACCHIATORE** has a 1-year validity from the production date on the casing.

**PRECAUTIONS**

**CLINETOR® ECO SMACCHIATORE is an oxygen promoter, so it must be kept out from combustible materials and from source of heat. It is irritating for the skin, the eyes, and by ingestion.**

After each use, carefully close the bag, preventing the product to meet the water. In case of skin rash, wash with lots of water. In case of contact with the eyes, wash and rinse with fresh water. In case of ingestion, consult a doctor and inform him the product is **sodium percarbonate**.

Keep the product out of children's range and do not disperse it in the environment. For any other information concerning the safety of the product, contact N.C.T. New Chemical Technology Srl Tel 0541.987658.

**PACKAGING**

1 kg box or bag.

25 kg paper and polythene bag.

The specifications stated in this report have been got either through standardized tests and rules or their modifications following NCT systems. The methods applied can be requested to our technical service.

All the data stated in this technical sheet are based on our knowledge and experience. However, before using the item differently from indicated, it is advisable to carry out preventive tests. In any case, NCT does not assume any responsibility for any damage or defect caused by the use of our products, as the employment conditions are not under our control. We also inform that our technical service is at our customers' disposal for any information concerning the correct employment of our products
